Journal of Computational and Applied Mathematics 63 (1995) 485–486

JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index to Volume 63 (1995)

(The issue number is given in front of the page numbers.)

Axelsson, O. and **M. Neytcheva,** Scalable algorithms for the solution of Navier's equations of elasticity 149–178

Bartoš, M. and **Z. Kestřánek,** Numerical solution of the contact problem. Application to a simple model of the human hip joint 439–447
Blaheta, R. and **R. Kohut,** Solution of large nonlinear systems in elastoplastic incremental analysis 255–264
Bock, I., On Van Kárman equations for viscoelastic plates 277–282
Bohl, E. and **W. Boos,** Binding protein-dependent transporters: an answer of mathematics to biology 11– 25
Bohl, E. and **I. Marek,** A model of amplification 27– 47
Boos, W., see **Bohl, E.** 11– 25

Carte, G., J. Dušek and **P. Fraunié,** Combined spectral-finite difference time discretization for periodic and quasi-periodic flows 245–254
Černý, R., see **Přikryl, P.** 357–363
Cháb, V., see **Přikryl, P.** 357–363
Chao, Y.A., Unifying via conformal mapping coarse-mesh neutron diffusion calculations in Cartesian and hexagonal geometries 449–456

Dostál, Z., Duality based domain decomposition with proportioning for the solution of free boundary problems 203–208
Dušek, J., see **Carte, G.** 245–254
Dvořák, J., see **Nedoma, J.** 411–420

Feistauer, M., J. Felcman and **M. Lukáčová-Medvid'ová,** Combined finite element–finite volume solution of compressible flow 179–199
Felcman, J., see **Feistauer, M.** 179–199
Fraunié, P., see **Carte, G.** 245–254
Frolov, A. and **S. Řízek,** Model of neurocontrol of redundant systems 465–473

Gawęcki, A. and **B. Janińska,** Computer analysis of slackened systems under variable loads 325–332
Gawęcki, A. and **M.S. Kuczma,** Elastic-plastic unilateral contact problems for slackened systems 313–323

Heise, B., Nonlinear simulation of electromagnetic fields with domain decomposition methods on MIMD parallel computers 373–381
Holeček, M., Model of critical behaviour in elasticity 271–275

Janińska, B., see **Gawęcki, A.** 325–332
Janovský, V., S. Shaw, M.K. Warby and **J.R. Whiteman,** Numerical methods for treating problems of viscoelastic isotropic solid deformation 91–107
Jersák, J., Numerical simulations in quantum field theory of elementary particles 49– 56

Kalkreuter, T., Multigrid methods for propagators in lattice gauge theories 57– 68
Kaukič, see **Kompiš, V.** 265–269
Kestřánek, Z., see **Bartoš, M.** 439–447
Kobza, J., Computing local parameters of biquartic interpolatory splines 229–236
Kohut, R., see **Blaheta, R.** 255–264
Kompiš, V., M. Kaukič and **M. Žmindák,** Modelling of local effects by hybrid-displacement FE 265–269
Koukal, S. and **M. Křížek,** Curved affine quadratic finite elements 333–339
Křen, J., A spatial problem of liquid–shell interaction 301–306
Křížek, M., Numerical experience with the three-body problem 403–409
Křížek, M., see **Koukal, S.** 333–339

Elsevier Science B.V.

Křížková, J. and **P. Vaněk,** Domain decomposition like technique with H/h-independent rate of convergence 215–220
Kuczma, M.S., see **Gawęcki, A.** 313–323

Lovíšek, J., Optimal control in coefficients of boundary value problems with a unilateral inner obstacle 283–290
Lu, H., Matrix compensation and diagonal compensation 237–244
Lukáčová-Medvid'ová, M., see **Feistauer, M.** 179–199

Maitre, J.-F. and **O. Pourquier,** About the conditioning of matrices in the p-version of the finite element method for second order elliptic problems 341–348
Marek, I., An introduction of Professor Owe Axelsson and Professor Miloš Zlámal 5– 8
Marek, I., see **Bohl, E.** 27– 47
Maryška, J., M. Rozložník and **M. Tůma,** Mixed-hybrid finite element approximation of the potential fluid flow problem 383–392

Nedoma, J., Preface 1– 3
Nedoma, J., Nonlinear analysis of the generalized thermo-magnetodynamic problem 393–402
Nedoma, J. and **J. Dvořák,** On the FEM solution of a coupled contact–two-phase Stefan problem in thermo-elasticity. Coercive case 411–420
Nedoma, J. and **J. Stehlík,** Mathematical simulation of osteotomy. Numerical analysis and results 421–438
Neytcheva, M., see **Axelsson, O.** 149–178

Panagiotopoulos, P.D., Modelling of nonconvex nonsmooth energy problems. Dynamic hemivariational inequalities with impact effects 123–138
Pourquier, O., see **Maitre, J.-F.** 341–348
Přikryl, P., V. Cháb and **R. Černý,** Computational modeling of solid-state reactions in the Ni–Si systems induced by pulsed lasers 357–363
Procházka, P., Optimal eigenstress fields in layered structures 475–480
